

Bamboo Biochar Charging Using Homemade Organic Nutrient Solutions

A Practical Guide for Jamaican Farmers and the Bamboo Industry Association of Jamaica (BIAJ)

Bamboo biochar can be successfully charged (activated) using homemade nutrient-rich liquids and organic materials including banana peels, green vegetables, eggshells, fish waste, animal manure, compost tea, diluted urine, and worm castings.

Suggested Formula:

- 100 kg Bamboo Biochar
- 50 kg Goat Manure
- 25 kg Chicken Manure
- 20 kg Chopped Banana Peels
- 5 kg Crushed Eggshells

Benefits:

- Improved soil fertility
- Better water retention
- Enhanced microbial activity
- Increased crop productivity
- Reduced nutrient loss

Business Opportunities:

- Activated Bamboo Biochar
- Biochar Organic Fertilizer
- Carbon-Rich Soil Conditioner
